| <i>E-Mail</i> | gserve@abiomed.com |
| <i>Website</i> | www.abiomed.com |
| <i>Founded (year)</i> | 2002 |

Abiomed develops, manufactures and markets circulatory support systems for numerous indications of cardiology and cardiac surgery. Abiomed Europe manufactures the world's smallest minimally invasive, high performance pump system with integrated motor and sensors. In addition, Abiomed Europe is responsible for marketing and sales activities of the entire Abiomed product line in Europe, the Middle East and Africa.

Our products provide a temporary solution while the patient is waiting for further treatment (cardiological or cardiosurgical intervention) and/or help the heart in recovering its own capabilities (bridge to recovery).
