AGIT is the development agency for the Technology Region Aachen. We support industrial companies and service providers and thus strengthen the economic structure of the Aachen region.

Our services:

- Among other buildings, in the ZBMT we offer 4,000 sqm high quality laboratory and office space, optimized for biomedical engineering.
- Regional innovative enterprises receive competent and intensive advisory services in all business issues from the concept phase to the establishment on the market and esp. for the innovation process.
- With our vast experience and many contacts we give companies valuable support in finding a new location in the Aachen region and accompany development procedures.
- Within the frame of the regional cluster development we assist the regional clusters and their members in developing and implementing of technology and innovation oriented business promotion projects within the scope of the NRW-EU program (EFRE) and the INTERREG program.
