Employees ca. 1400

Founded (year) 1863 (Bayer AG)

Engineering & Technology, a Corporate Function of Bayer AG, offers fully-integrated solutions along the life cycle of chemical/pharmaceutical plants – from development of new processes through engineering and construction to process optimization for existing and new plants of Bayer.

Engineering & Technology supports the Bayer divisions and their partners with new technologies for Healthcare and Crop Science. This corporate function employs ca. 1,400 experts worldwide at its headquarters in Leverkusen and other German sites, as well as in regional offices in Belgium, Brazil, India, Mexico, PR China, Russia, Singapore and the United States.
