Employees 100+

Founded (year) 1999

Hemoteq AG provides enabling technologies for innovative medical devices featuring bioadaptive surfaces that promote healing, device bio-integration and regeneration.

The company develops and manufactures customized coatings for medical devices and combination products such as drug-eluting stents, drug coated PTA and PTCA catheters and implants marketed globally by leading device manufacturers. Patients around the globe benefit from life-saving therapies utilizing Hemoteq coatings on a wide range of certified products.

Unique technical and professional know-how, short development cycles and comprehensive regulatory support ensure fast track market access with competitive products.

Coatings “Made in Germany” are manufactured in state-of-the-art cleanrooms by highly qualified employees at Hemoteq premises near Aachen.
