Imagine Engineering GmbH stands for innovative solutions in hygienic engineering and process technology with special focus on packaging and product-handling systems for pharmaceutical and food industry. It is our passion to explore advanced technologies strictly tailored to the specific requirements of our customers and their field of application. Therefore, our company provides a comprehensive range of services: starting from the initial concept, to the mechanical design and electrical engineering, ending up in building prototypes and production readiness. Together with our further experience in simulation-based engineering of multi-physical systems, we are perfectly prepared for our customers' pioneering projects.
