SYNLAB pharma institute Aachen is a service-based partner for the international pharmaceutical and biotechnology industry. We provide fully GMP-compliant analytical services and are an FDA approved laboratory.

The analytical focus of SYNLAB pharma institute Aachen is on structure elucidation using state of the art equipment using LC-MS/MS, LC-Q-ToF-MS, SPME GC-MS, GC-MS, NMR/qNMR, semi and fully preparative HPLC, isolation and synthesis of degradation products in drug substances and products. In addition, we offer characterization and qualification of reference standards, planning and execution of extractables & leachables studies and toxicological assessments of contaminants.

Method development, method validation and release analysis give our customers the full quality-control package needed for clinical studies and filing. Our analytical experts guarantee a quick and target oriented solution more extensive than the standard analytical requests.
