For 18 years LIMS at work GmbH has been supporting its customers in all questions of quality assurance and quality management in the lab environment. We provide software, consulting, and managed services up to development of tailor-made software tools. Our focus is on pharma, biotechnology, petrochemicals, and geology. Our customers particularly appreciate our practice-oriented approach.

As a part of a strong partner network, we have access to a huge range of experts and solutions.

We develop solutions that really meet specific requirements efficiently and with high quality: Get in touch!
