Founded 2013

Science communication is my profession. Combining the expertise of a biologist and a science journalist I offer flexible support for your communication in life science, medicine & pharma.

My way: clearly and precise, focused and exciting – tailored to meet your and your target group's needs. My services cover PR, text and concept. I prepare your content with scientific know-how, technical understanding and journalistic quality. Whether in press relations, science editing or marketing communications, I implement your aims effectively.

I enjoy working for companies, associations, universities and other educational and research institutions as well as scientific publishers. To realize projects which surpass my range of services I am working closely with graphic designers, copywriters and translators.
