Founded (year) 1995

Our core competence is the development of innovative remote service solutions and validated systems for the pharmaceutical industry. Our commitment is high-level technical quality for long-term customer satisfaction.

eurogard GmbH's product portfolio

- Production and distribution of in-house developed remote access solutions in the area of plant and machine automation and industrial networking
- Delivery of complete hardware and software packages for validated monitoring systems for the pharmaceutical sector, as well as measurement and control systems for building technology. We also develop customised software for technical applications
- Development of scalable energy management systems according to ISO 50001
- Distribution and service of the PCD-PLC system of Swiss manufacturer Saia-Burgess Controls AG and sensor systems from a variety of different manufacturers
