Business Development Partner for Medical Devices in plastic

RALCON offers an interesting and reliable network of partners and processors who work together to realize medium- and high-quality technological solutions for plastic applications. Applications in particular medical devices, packaging solutions and industrial issues. With injection molding as key-focus, assembly, laser applications and a combination of materials or techniques will lead to exceptional results.

RALCON selects the right partner at the right time for a specific assignment. Lead-time and cost reduction are achieved through the use of various 3D techniques or the use of affordable aluminum injection molds for small series.

RALCON is your contact for plastic products; from 1 piece up to 1 million pieces (under ISO 13 485)!
